SUPPLEMENTAL RESPONSE

Dear Sir:

This response is supplemental to the complete response mailed 28 January 2000.

Please amend the above-identified application as follows:

IN THE CLAIMS

Please enter new Claims 16-20 as follows:

16. (New). A scroll compressor as recited in Claim *12*, wherein a one-way clutch connects said rotary motor to said second scroll when said motor is driven in said forward direction, such that said transmission does not affect the speed of movement of said second scroll when said motor is driven in said forward direction, and said one-way clutch allowing relative rotation between said motor and said second scroll member when said motor is driven in said reverse direction such that the drive of said second scroll by said rotary motor passes through said transmission when said motor is driven in said reverse direction.
